

Installing PowerBook G4 Titanium Mercury RAM

Parts relevant to this guide

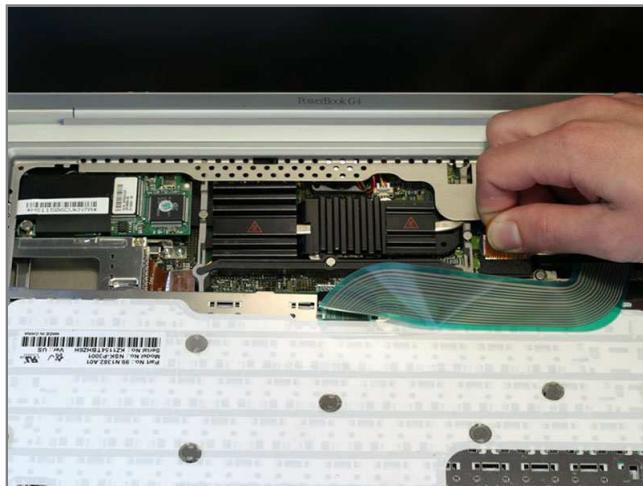

- [PC133 256 MB RAM Chip](#) (1)
- [PC133 512 MB RAM Chip](#) (1)

Two RAM slots allow up to 1 GB of PC100 or PC133 RAM.

Step 1 - Keyboard

- Remove the battery.
- Turn the keyboard locking screw so that it is parallel to the space bar.
- Pull the keyboard release tabs toward you and lift up on the keyboard until it pops free.

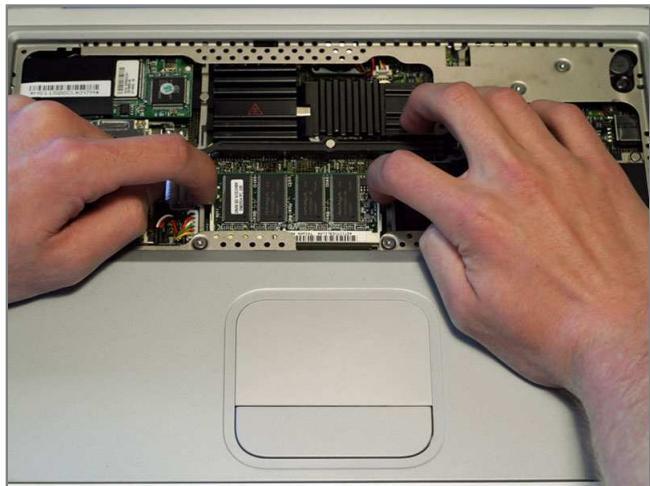

Step 2

- Rest the keyboard face down on the trackpad area.
- Disconnect the keyboard connector from the logic board.

Step 3

- Your laptop should look approximately like this.

Step 4 - RAM

- Release the tabs on each side of the RAM chip at the same time. These tabs lock the chip in place and releasing them will cause the chip to "pop" up.
- Pull the RAM chip out.
- Repeat this process if a second RAM chip is installed.

To reassemble your device, follow these instructions in reverse order.

2 T8 Torx

To organize your screws,
simply place each screw
in the appropriate box
as you remove them
from your laptop.

If you are not planning
on immediately
reassembling your
laptop, you may want to
tape the screws to this
paper.

Due to model variations,
the screws you remove
may differ slightly from
this guide.
